Stochastic bubbles driving a cosine axion field
H*=beta=mt=1 · mf=0 · L=3 · v=0.5 · 100,000 tracers · seed 0
Axion mean
Mean theta
Cosmic time t=tau²/2
N=32, du=0.005
N=64, du=0.005
N=64, du=0.0025
Generated inhomogeneity
Standard deviation of theta
Cosmic time t=tau²/2
N=32, du=0.005
N=64, du=0.005
N=64, du=0.0025
False-vacuum geometry
False-vacuum fraction F
Cosmic time t=tau²/2
Analytic ensemble F
Catalogue geometry, seed 0
Internal tracer fraction
Before field initial data
Final field slice, z=1.5234, tau=2.5
y (comoving)
x (comoving)
theta
